## WORK EXPERIENCE

**Front-End Developer**                                              *August - December 2023*
**8box Solutions Inc. |** *Pasig City*

- Worked alongside senior developers to create dynamic and user-centric websites and web applications utilizing technologies such as ReactJS, HTML, CSS, JavaScript, EJS, and MySQL for database management.
- Assisted in implementing frontend features and functionalities according to project requirements and design specifications.
- Contributed to code reviews, bug fixing, and troubleshooting to ensure the quality and stability of web applications.
- Worked closely with designers and backend developers to integrate frontend components with backend APIs and services.
- Participated in team meetings, providing updates on project progress and discussing technical solutions and challenges.

**Freelance Front-End Web Developer & Designer**                    *March 2022 - August 2023*

- Worked directly with clients to understand their branding, design preferences, and functional requirements for websites.
- Designed and developed custom, responsive websites using HTML, CSS, JavaScript, and ReactJS, ensuring cross-browser compatibility and optimal performance.
- Created wireframes, mockups, and prototypes using design tools such as Adobe Photoshop, Canva, and Figma to present design concepts to clients.
- Collaborated with clients throughout the development process, incorporating feedback and revisions to deliver high-quality designs that meet their expectations.
- Managed multiple projects simultaneously, ensuring timely delivery and adherence to project timelines and budgets.

## EDUCATION

**Bachelor of Science in Computer Engineering**                     *2021 - 2024*

Polytechnic University of the Philippines - Manila

*Relevant Coursework:*

- Introduction to Networking
- Cisco Networking Essentials
- Advanced Routing and Switching
- Network Security Fundamentals
- Wireless Networking
- Operating Systems
- Object-oriented Programming
- Engineering Data Analysis
- Programming Logic and Design
- Data Structures and Algorithms

## PROJECTS

**Cisco Network Simulation Project**

- Designed and implemented a network topology using Cisco Packet Tracer.
- Configured routers, switches, VLANs, and inter-VLAN routing to simulate a real-world network environment.
- Troubleshot connectivity issues and optimized network performance based on project requirements.

**Portfolio Website**

- Designed and developed a portfolio website for a freelance photographer using HTML, custom CSS animations and Javascript.
- Explore my portfolio website to view examples of my work and projects: **Shin Lim's Portfolio**
